

Abdulkadir Maxamed

MSc Cyber Security & BSc Computer Science

Profile

Associate software engineer adept in bringing forth expertise in designing, implementing, and testing solutions according to client specifications. Able to efficiently self-manage during independent projects, as well as collaborate effectively as part of a productive team.

Employment history

CodersIO – Founder

London, London

08/2022 - Current

- Scaling a small tech community to 400+ students.
- Providing students with live lessons and resource material to assist them with learning coding languages.
- Hosting several talks with established software engineers to inspire students with their journey in coding.
- Mentoring students in the community by providing CV help and interview preparations.
- Planning and executing marketing strategies in order to generate more sales.
- Outreach and networking through B2B in order to provide additional branches of opportunities for students.

Capgemini – Software Engineer

Telford, Shropshire

11/2021 - Current

- Implemented scalable solutions based on application data extracted and analysed by senior developers.
- Created and implemented automated testing solutions according to client's needs, along with deploying onto cloud infrastructure such as AWS.
- Designed and executed various test plans ranging from integration to system testing.
- Implemented and updated application modules under the direction of the solutions architect during projects.
- Regularly maintained and created technical specifications to include newly designed features for developed applications.
- Mentored new starters, providing knowledge transfers on systems used.

OWO Living - Full Stack Software Developer

Birmingham, West Midlands

10/2018 - 08/2019

- Designed, implemented, and monitored company stock management and sites for continuous improvement in a fast-paced environment all under one holistic software.

Skills

- JavaScript
- Node JS
- NextJS
- Flutter/Dart
- Oracle SQL
- PL/SQL
- HTML 5 & CSS 3
- TDD
- Agile Scrum
- Git Version Control
- AWS
- RESTful API implementation

Education

11/2020

Coventry University

Coventry

Master of Science : Cyber Security

11/2019

Coventry University

Coventry

Bachelor of Science : Computer Science

Hobbies

- Football
- Gym

- Enhanced coding of CSS and JavaScript, improving user experience score from use of excel spreadsheets to a more appealing software.
- Utilised programming languages such as JavaScript and ReactJS to create and complete client projects according to the specification set beforehand.
- Created a bespoke backend system to maintain company's stock.
- Work independently with efficiency to meet client deadlines on projects.
- Applied the Software Development Life Cycle to keep track of project deadlines to ensure the client knows the progress of the project.

Projects

Mobile App Development

In my spare time, I develop mobile applications to improve my daily routine and expand my skills. I explore new programming languages and tools, currently focusing on Dart to create small apps and enhance my development techniques.

theNames App

Collaborated in a team to build a Restful API, responsible for implementing a TDD framework to test the API before development and configuring authentication to secure the API endpoints.

Certification

- ISTQB Foundation Tester
- AWS Cloud Practitioner
- Microsoft Azure Fundamentals
